Education

University at Buffalo — Buffalo, NY
Bachelor of Science in Computer Science – 3.8/4.0 — *December 2025*

Experience

Lead Customer Service Representative — January 2026 – August 2026
Cannon Industries — *Rochester, New York*
- Processed daily shipping paperwork and reconciled prior-day logistics documentation.
- Generated and reviewed EDI comparison reports to ensure order accuracy across customer accounts.
- Submitted Advance Shipping Notices (ASNs) to customers in compliance with shipping requirements.
- Prepared NAFTA certificates of origin to support compliant cross-border shipments.
- Utilized quoting systems to prepare and process customer price quotes.

Lead Receptionist — December 2025 – April 2026
H&R Block — *Rochester, New York*
- Served as first point of contact, addressing client inquiries in a fast-paced office environment.
- Scheduled, rescheduled, and canceled client appointments to optimize daily tax preparer workflow.
- Checked in clients and verified documentation to ensure smooth transition to appointments.
- Managed high call volume while maintaining a professional and welcoming front-desk experience.
- Coordinated scheduling logistics to minimize wait times and maximize preparer availability during peak tax season.

NextGen Plastic Sorting Researcher — May 2025 – July 2025
University at Buffalo — *Buffalo, New York*
- Investigated NIR spectroscopy limitations in detecting contaminated, colored, and multilayer plastics to enhance sorting accuracy.
- Applied and compared machine learning models and data preprocessing pipelines to improve plastic type classification.
- Designed a proposed system integrating multiple spectroscopy techniques to increase recycling efficiency and material recovery rates.
- Collaborated with a research team to compile results into technical reports and present findings to faculty advisors.

Teaching Assistant — January 2025 – December 2025
University at Buffalo — *Buffalo, New York*
- Supported students in CSE 396 (Introduction to the Theory of Computation) through office hours.
- Clarified complex concepts and strengthened problem-solving skills.
- Assisted in grading assignments and exams with accuracy and consistency.
- Managed multiple groups for CSE 420 (3D Video Game Development) game design project.

Projects

Nutritional Meal Planning Websites | *React, PHP, SQL* — January 2025 – December 2025
- Developed a full-stack nutrition app with modules for Profiles, Recipes, Meal Planner, Shopping List, and Progress Tracking using React, PHP, and MySQL.
- Built secure APIs with prepared statements, CSRF tokens, input sanitization, same-site cookies, and CORS; ensured cross-table sync for edits and deletes.
- Delivered a responsive, accessible UI using Tailwind and reusable components with modals, toasts, keyboard support, and mobile optimization.
- Designed a normalized database schema and optimized queries for fast, consistent reads/writes across recipes, ingredients, and user data.
- Created end-to-end tests and validated APIs with Postman and DevTools, covering auth flows, errors, and security edge cases.

AWS Cloud-Resume Challenge | *AWS, Python, JavaScript* — December 2024 – February 2025
- Designed and deployed a responsive static website using **HTML, CSS, and JavaScript**, hosted on **Amazon S3** with **CloudFront for global content distribution**. Configured **Route 53 for domain registration and DNS management**, ensuring high availability and reliability.
- Built a serverless backend using AWS Lambda, utilizing **DynamoDB** to manage visitor counts for scalability and performance. Implemented a **CI/CD pipeline to automate deployments** and improve efficiency.
- Automated **infrastructure provisioning using Terraform**, ensuring seamless resource deployment. **Configured Amazon CloudWatch** for real-time monitoring and logging, while securing website traffic with **HTTPS** via **AWS Certificate Manager**.

Technical Skills

Languages: Python, Java, C/C++, SQL, HTML, CSS, JavaScript, TypeScript, Rust
Developer Tools: Docker, Git, AWS Cloud, Tesseract, MongoDB
Libraries & Skills: pandas, NumPy, Flask, Agile
